REALIZAÇÃO

# Presentation

Promoted by the Brazilian Concrete Institute (IBRACON), the Brazilian Concrete Conference established itself as the largest technical forum in Brazil for debates on concrete technology and their construction systems. More than 950 technical-scientific studies are presented in each edition, covering structural analysis, structural design, construction methodologies, materials and their properties, management and standardization, non-destructive tests, and sustainability. Each year, more and more companies are showing interest in attending the event, at the Brazilian Concrete Construction Show (FEIBRACON), highlighting their brands, products, and services.

# FEIBRACON

Companies and associations committed to the technical quality and sustainability of the Brazilian construction sector have the opportunity to be present at the largest Brazilian technical-scientific event on concrete technology and its construction systems, as sponsors and exhibitors at the Brazilian Concrete Construction Show (FEIBRACON).

In addition to strengthening customer relations and closing potential deals, companies have the chance to establish an institutional presence in a discussion forum, attended by over 1,000 panelists and over 5,000 visitors, from various sectors of the concrete chain, such as project offices, technology control laboratories, construction firms, suppliers of materials, equipment and services for construction, government agencies, teaching and research institutions, and technical entities.

# INSTITUTO BRASILEIRO DO CONCRETO

The national technical-scientific association of Civil Engineering professionals and companies, founded in 1972, with the aim of promoting concrete technology and its construction systems.

It promotes courses and events, publishes technical publications, organizes student competitions and professional awards, and promotes the activities of Technical Committees, encouraging and disseminating scientific and technological research, as well as qualified technical debate in the construction chain.

# PROGRAM

## EKnowledge Space

A space set up at the 16th FEIBRACON, in which the New Technologies Seminar will be held, with a technical program focusing on the practice of construction.

## Program Topics

International Keynote Lectures  
Civil Engineering Teaching Seminar  
Tall Buildings Seminar  
Controversial Topics  
Scientific Sessions  
Poster Sessions  
Durability Symposium  
Late-Night Session

## SPONSORSHIP QUOTAS

# DIAMOND

US\$ 30,000.00
